

# Lighting – Specific Things to Know

- Be sure to check the equipment to make sure it works. If not, please notify SAMMIE immediately!
- Note that this kit has a strobe light. The setting of strobe on the light has been known to cause involuntary seizures in some individuals. Be sure to notify participants of this. It may also be prudent to have a parental release form for any program that will include the strobe light element.

---

## Programming Ideas

- Use it with:
  - the Instruments kit for a “coffee shop” performance.
  - the Karaoke kit to give a stage feel to the program.
- Use it on its own for theater performances or teen poetry slams.
